

MUN. ELECTIONS
IN ALL DIVISIONS

The officials of the Municipal District of Carbon No. 278 have received information from the Department of Municipal Affairs, advising them that it will be necessary at the next elections to hold a general election in all six Divisions of the Carbon Municipal District. Following is the communication from the Department:

"Whereas Division No. 7 has been eliminated and the boundaries of Division 5 and 6 of the Municipality altered and adjusted, thus changing the representation in the said Municipality, the Minister, under the provisions of The Municipal District Act, orders that a General Election is to be held in all six Divisions at the period provided in the said Act."

LETTERS TO THE EDITOR

The Editor, The Chronicle:
Dear Sir:

Having seen in the weekly press that there is a possibility of an election in every district of the Carbon Municipality next February, I think this is the opportunity to bring before the people of this municipality the necessity of the formation of an active ratepayers association in every district, immediately.

There is no doubt that these troubled times cause quite a lot of discontent among the people, who of course, must have someone to blame for any real or imaginary grievances, and naturally the executive of any public office will be their prey.

Now, I maintain that our councillors are more in need of friendly co-operation from the ratepayers through the present critical times, than at any other time in the history of Alberta, and they would appreciate any movement whereby they can get this co-operation.

In past years we have had many elections, but there was never any meeting of the ratepayers prior to the nomination day whereby they could discuss the possibility of any probable candidate for election or choose the best man in the ward for this position. In the past the usual proceedings on nomination day have been for one or two to sign the papers for a certain candidate, never finding out if the nominee was satisfactory to the majority of the people in that district or not.

This is not casting any reflection on the part of the past or present councillors as I believe they have done the best they could under the circumstances. There are many problems that come before them which call for immediate action, also unforeseen expense, that the people do not know about, so we should be very careful and think before we criticize them, while we meet in the main street of the village.

If we form these associations we could meet and discuss all the formalities and bring our grievances and criticisms to them, where our councillors would be in a position to defend themselves and also enlighten the people on any subject that interests them pertaining to the Municipal affairs.

Anyone wishing to take up this matter for Division No. 1, I would be greatly pleased to hear from them.

T. J. KIN

1,071 AMERICAN FIRMS
IN CANADA

United States' investors own 1,071 of the 1,260 branch, subsidiary and affiliated establishments of British and foreign countries in Canada, according to the information received by the Industrial Department of the C. N. R. The combined capital employed in the firms totals \$1,746,220,000, of which Americans have invested 68 per cent of the total, while Canada owns 17 per cent. Inversely, Canadians hold more stock in American concerns than they do in British establishments.

14th Government
Crop Report

(Issued by Department of Agriculture)

The concluding chapter of Alberta's 1931 production story is now written and the ending is a more happy one than the beginning would have led the general public to expect.

Reports received by the Provincial Department of Agriculture during the past week in preparation for its final crop report, reveal very satisfactory rural conditions over a considerable portion of the province, although in the southeastern section the story is in sharp contrast to that told in other sections. Threshing of wheat is completed throughout the province, and save in the section mentioned, all districts report excellent yields and quality, previous reports in this respect being fully sustained. Threshing was brought to a conclusion under perfect weather conditions, and many farmers took advantage immediately of the higher wheat prices with the result that a large proportion of the crop has already been marketed, grading well up and bringing substantially better returns all round than was at first anticipated.

Central and northern Alberta and the Peace River district report fifty to sixty per cent of wheat marketed and grading one and two. Peace River expects the average of wheat to be 20 bushels with 40 for oats, while districts nearer Edmonton report an expectation of a 25-bushel average with many fields running up to 30 and 40. Lacombe district reports having harvested two crops in one. Sedgewick district speaks of an average of 26 bushels of wheat and 50 of oats. Farther south Olds reports over one million bushels of wheat marketed, grading well, with wheat averaging 30 bushels. The southeastern district is not so fortunate, with wheat running from nil to 10 bushels, and with water for stock proving a serious problem and a big demand for feed.

Raymond and Lethbridge are jubilant over the results of the sugar beet crop which is averaging high in yield and sugar content, and is keeping the Raymond factory working to capacity, but the grain reports from these districts are just average. Claresholm district has had an excellent yield of grain. At Brooks wheat has averaged 25, oats 35, and barley 30, with fifty per cent of wheat marketed. This district has harvested 250,000 pounds of alfalfa seed and 300,000 lbs. of sweet clover seed, with hay put up under ideal conditions.

Generally speaking very little fall plowing has been done owing to lack of moisture in the soil.

With respect to general average of

ALBERTA NEWS

Benj. Lawton, Chief Game Commissioner for the Province of Alberta, died at his home in Edmonton on Saturday, Nov. 21, after an illness of over a week. Mr. Lawton was in the employ of the provincial government since 1906.

John Rangust, well known farmer of the Hanna district, had the misfortune to lose 15 head of horses recently when one of his grain bins burst and the animals filled up on wheat.

In keen competition Herman Trelle of Wembley Alta., carried off first honours in registered marquis wheat at the Royal Winter Fair.

Transported by aeroplane, ship and train from the steamer Baychimo, helplessly jammed in the ice several hundred miles North of Nome, Alaska, after spending three weary weeks on board, Ray Ross, of Edmonton, arrived at that city last Thursday on his first visit to civilization from his Arctic home at Bernard Harbor, in six years.

Municipal districts and others must make every effort to pay their taxes in order to aid in the conduct of the administration systems, declared Premier Brownlee addressing the 22nd annual convention of the Alberta Association of Municipal Districts, last Thursday.

Advisability of raising the gasoline tax in Alberta is one of the problems now concerning the special governmental committee surveying the entire provincial financial position as a result of the tremendous drain on the treasury department for unemployment relief measures.

W. E. Payne, K.C., Conservative, is winner of the Red Deer by-election according to the result of the final count of the ballots. The final figures of the third count gave Mr. Payne a total of 1804 votes as compared to 1663 for R.L. Gaetz, U.F.A., giving the Conservative the victory by a majority of 141.

Ratepayers of the town of Strathmore approved of a \$7500 high pressure irrigation system for the town at a meeting held this week.

John O'Sullivan, Communist Candidate in the Calgary civic elections, last Wednesday, was sentenced on the same day at Drumheller to a year's imprisonment for taking part in an unlawful assembly. He and four others, have appealed the case.

The Drumheller Arena opened for skating last Wednesday night with a good attendance. There will be skating every Sunday afternoon from 2 to 4. The Drumheller Miners are taking advantage of the ice and are practicing. We understand that Paul Wells, at one time on the staff of the Imperial Lumber Yards at Carbon, is trying out with the Miners this year.

Gravelling of the main highway was recently completed as far east as the town of Brooks and gravel now extends right through from Calgary to that town. No more gravelling will be done on that road this year.

wheat for the province, the final estimate of the Dominion Bureau of statistics places the average of 16.9 bushels per acre, taking into account the total area actually seeded, much of which, in the southeastern district yielded a very small harvest indeed. This is in line with the estimate submitted to the Dominion Bureau by the Alberta Department of Agriculture on September 12th.

Livestock conditions in the southwestern central and northern districts are reported to be very good, with plenty of feed. As stated however, the southeastern districts are suffering for lack of both feed and water supply. There will be considerable increase in the number of cattle on feed in some of the districts.

FIRST CONFIRMATION SERVICE
IN ANGLICAN CHURCH

The first confirmation service ever held in Carbon was in the Anglican Church on Sunday November 22, 1931. The Right Reverend L. Ralph Sherman Lord Bishop of Calgary conducted the service, assisted by the Rev. L.D. Batchelor, curate in charge of the Carbon Church. An eloquent address was given by the Lord Bishop to the candidates, who numbered 24 in all, and he commented on the splendid work that was being done by the Curate in as much as there was such a large number of candidates, and the splendid manner in which they had been instructed in the ritual of the church.

Hockey Team To
Enter League

A meeting of the members of the Carbon hockey club was held in the Carbon Hotel on Wednesday evening last and routine business was dealt with. It was decided to have the lighting arrangement changed and to install twelve large lights with reflectors, around the edge of the ice so as to have plenty of light for hockey games. This work is now being done. The appointing of a caretaker was decided and R. Skerry will have the looking after of the skating ice this winter.

A proposition was made to the Carbon club to enter a team in a league this winter with the clubs of Swallow, Beiseker and Acme, and the Carbon boys decided to enter a team should such a league be formed. This will mean that there will be more competition in hockey games this winter and more interest should be taken in the game.

WARM WEATHER HINDERS
MAKING OF ICE

The warmer weather the past week has hindered ice making at both the skating and curling rinks in Carbon, although a few of the faithful members of the curling club have been on the job doing repair work to the curling rink. This work, which included the moving of the walk from one side, to the centre of the rink, and the changing of the door to the centre, has now been completed and the rink is ready for the water.

The curling rink will be run by the members of the curling club this year. Work is also progressing at the skating rink and the pipe, pump and engine are now all connected and ice making has commenced, although it is slow work on account of the warm days. It will take another cold spell before any real body of ice can be made.

CHANGE MADE IN
MAIL SERVICE

It was announced last week that, commencing on Sunday, November 22, a change would be made in the train service of the C.N.R. from Calgary to Edmonton, and that this train would only go to Edmonton three times per week, Monday, Wednesday and Friday, and would arrive at Granger at 11.05 a.m. This train returns from Edmonton to Calgary on Tuesday, Thursday and Saturday and arrives in Granger around 4.30 p.m. This means a change in the mail service for Carbon, as mail for this town comes to Granger and then by stage daily to Carbon. Now the mail arrives in Carbon on Monday, Wednesday and Friday at approximately 11.40 and on Tuesday, Thursday and Saturday the mail arrives about 5.30 p.m.

Although this change in mail service is less advantageous to farmers than formerly, it still gives Carbon a daily (except Sunday) mail service. Outgoing mail to Calgary will also leave daily and arrive in Calgary the same as formerly.

SUNSHINE RELIEVES ALBERTA
SUFFERING

Never before in the history of Alberta were the needs greater in respect of relief of suffering than they are today. Through no fault of their own, thousands in the city and the country feel the lack of employment and lack of farm products.

An organization that has functioned for nine years to relieve distress is the Calgary Herald Sunshine Society. It operates throughout the entire year.

During July, August and September no less than 7000 individuals, mainly children, were assisted by Sunshine. In October 3,243 individuals were similarly helped. With winter weather the number naturally increases.

There are 6000 unemployed persons in Calgary. Many come from various parts of the province. Country needs are looked after as well as those in the city. Sunshine appreciates assistance of any kind—whether in money, grain, clothing or food. Potatoes, vegetables, almost any kind of farm product will be gladly received.

Those who wish to help are invited to communicate with Sunshine, care of the Calgary Herald.

There is still time to get personal Greeting Cards for Old Country mail. If you order them from The Chronicle Office, We can print them for you within a couple of hours after an order is placed.

"SALADA" TEA

'Fresh from the gardens'

Don't Attempt Too Much

In these days everybody is, or at least should be, learning some valuable lessons in the economics of business and work which should assist him in the years to come. The experiences of today are, undoubtedly, revealing to some people just where they made mistakes in the past, mistakes which had they been avoided would not have landed them in some of their difficulties of the present. Countless thousands of people are being compelled to make drastic retrenchments in the conduct of their business, living expenses, etc., which would not have been so necessary had reasonable retrenchment been made in years gone by and a curb placed upon the satisfaction of their desires. Many people are saying "Never again" will they be caught doing what they formerly and mistakenly did do.

The varying detail of the great lesson which experience is teaching us cannot be discussed in one article or possibly in one hundred articles. But in reading a recent magazine article, dealing with the life experiences of one man in which that man told of an incident happening when he was six years old, and which he considers the most important lesson he ever learned, in school or out, the thought presents itself that in this new Western country perhaps a goodly number of people have made the mistake which this man so early in life learned to avoid. At all events the incident is, we believe, worth repeating inasmuch as it carries its own interpretation.

The now eminently successful man to whom reference is made was set to work by his father thinning out the growing peaches from trees that were too heavily laden. The boy protested to his father that he did not see any sense in so doing, and asked: "Why not let them all grow and have more peaches?" "All right," replied the father, "We'll try it both ways. One tree we won't touch at all. That'll be your tree. The other tree we'll thin out so that the only peaches left will be at least six inches apart. That'll be my tree. And we'll see what'll happen." The boy, now grown to successful manhood, says he watched the fruit grow and ripen and at last the fruit was ready to pick. "My tree," he says, "yielded about six bushels of runty little culls. And my father's tree yielded more than eight bushels of fine, large peaches. All because he had thinned out the load on his tree and left mine to struggle along with more than it could handle."

And all that this wise father said to his boy: "Trees are a lot like people. If you want to get good work out of them, you have to find out how much work they can handle well. Then give them that much work to do. If you try to work them too hard, you'll spread their energy all along the line and give you second-rate results."

The question is: Have not too many of us here in the West spread ourselves out too much, instead of confining ourselves to the main job? In an intense desire, a laudable ambition, to get on, have we not attempted too much, dissipated our energies over too great an area instead of giving greater application to fewer things and made them truly successful? For example, have not many of us yielded to the very natural temptation to acquire more land than we can successfully cultivate, rather than be content to work to its capacity the old original quarter or half section? Would we not be better off today had we resisted that temptation to spread out, to take on too much?

And is not this simple illustration of increase of acres acquired, this spreading out of our energies which such increase entailed, merely an illustration after all of other tendencies in our life which, when the first check comes, or difficulties arise, land us in trouble beyond our capacity to handle?

Each man doing his own particular job and doing it well, rather than attempting several jobs and doing all of them in an inferior way, is the sound, safe way,—the way which, in the long run, achieves the largest measure of success.

Clause Again In Use

War In Manchuria Boosts Insurance Rates For Pacific Shipping

War insurance rates are now being quoted by companies dealing with Pacific shipping, it is announced.

Although the war clause has been in all insurance policies it has been inactive since the end of the Great War. When that conflict broke out the war risk rate to the Orient was as high as 2½ per cent. owing to the presence on the Pacific of German raiders.

The insurance companies announce that war insurance will be applied on cargo from Hong Kong northward, the scale increasing in proportion to the rate of possible risk. Hong Kong is lowest, with approximately 1-10 of one per cent. premium. Further north the rate jumps, approaching a full one per cent. for Harbin, where actual hostilities affect freight movements.

Basic economic conditions in Japan are reported to be improving.

Heads Welfare Agency

Hon. T. A. Crerar To Direct New Organization In Winnipeg

Hon. T. A. Crerar, former Dominion Minister of Agriculture and Minister of Railways and Canals, heads a new organization of Winnipeg social agencies called the Greater Winnipeg Welfare Committee.

Under Mr. Crerar's direction representatives of some 100 social organizations will work for the betterment of conditions among the unemployed of the city and surrounding municipalities. Schemes to provide employment, recreation and entertainment with a view to keeping up the morale of the workless men and women will be inaugurated by the committee.

Nearly 100,000 people in the Barcelona district of Spain are working in textile mills.

The woman always pays—if her husband doesn't forget to give her the money.

So Short Of Breath Would Have To Sit Down

Mr. C. M. Stroeder, Hanover, Ont., writes:—"I could hardly do my work, and after going up or down stairs I had to sit or lie down for a while as I would be all out of breath."

I could hardly go down town for if I walked two or three blocks I was ready to fall over.

I took several boxes of Milburn's Heart and Nerve Pills and am glad to say I have been totally relieved of my trouble."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Showed Originality

Illinois Woman Accused Of Singing Insults At Neighbor

Mrs. Elfreda Dohring of Evanston, Illinois, says she doesn't like to be insulted in the key of "F" or any other musical scale.

So she went before Police Magistrate Harry H. Porter and swore out a warrant for her neighbor, Mrs. Pearl C. Dorband, saying that for two years Mrs. Dorband has been singing insults at her from her back porch.

Sometimes, she said, the insults were by implication in popular songs and sometimes Mrs. Dorband just made up her own songs.

FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on this plan. I dropped the hems; and as the part that had been turned under was darker than the rest, I redyed the entire dress, after having bleached the goods, following directions in the Diamond Dyes package."

"I used Diamond Dyes for the redyeing, of course. I have dyed many things with these wonderful colors. They have saved me many dollars and have never failed to give perfect results—smooth, even colors—fast to wear and washing. Friends think my things are new when I redye or tint them with Diamond Dyes. They do give the most gorgeous colors!"

Mrs. G.C., Lewis, Quebec.

International Bridge

Four Players On Ocean Liner Spoke Different Language

During an ocean voyage four passengers made up a game of bridge. One was a German, one an Englishman, one a Portuguese, and the fourth a Frenchman. Not one of them could speak the language of the others. Fortunately, an interpreter able to speak all four tongues was available, and he stood by and interpreted each call trilingually. The game went quite well. Incidentally, the obliging and talented interpreter was a Pole by birth, though of German nationality by adoption.

Cause Of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions.

Dust from the street, from flowers, from grain, and various other irritants may set up a trouble impossible to irradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Palm Prints As Detectors

Just As Infallible As Finger Prints Opinion Of Inspector

Palm-prints as opposed to finger-prints were used for the first time in a court of law when a prisoner pleaded guilty at the Old Bailey to house-breaking and shop-breach. The Recorder asked whether palm-prints were as infallible as finger-prints. Detective-Inspector Cherrill said the matter had been studied by Scotland Yard for some time, the conclusion being in the affirmative.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions prevail. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

A Glass Of Cold Milk

School days are milk days and rightly so, because no other food is so refreshing, healthful and nourishing as milk. When the boy or girl comes home from school at four o'clock they are hungry and tired and the wise mother knows that a glass of milk is the most healthful and easily prepared food she can provide. The four o'clock glass of milk should be part of the school-day programme. —Department of Agriculture, Ottawa.

Already Dead

A certain Missouri editor refuses to publish obituary notices of people who, while living, failed to subscribe to his newspaper, and gives this pointed reason:—"People who do not take their home town paper are dead anyway, and their passing away has no news value."

W. N. U. 1917

Another Triumph Of Electricity

Pulsynetic Electrical Systems Now In Use On Most Liners

Ever since John Harrison produced in 1765 the first marine chronometer, the science of keeping time on board ships at sea has become more and more accurate, until today, the average ocean passenger liner has at its disposal the combined knowledge of the world's observatories transmitted by wireless and recorded by electric clocks. There is, in fact, no excuse for being late nowadays aboard ship.

In the old days the chronometer served within a varying degree of accuracy to acquaint a captain with the time of the day or night, which he checked with the aid of observations of the sun and stars. Since the introduction of wireless telegraphy, it has been possible to keep a check on the chronometer of which every well-found ship carries three. Each is specially constructed to remain level when the ship is pitching and rolling, and is contained in a glass case maintaining an even temperature. In spite of this, there are always slight errors which are journalized. "Time is checked from time-signals sent out from some forty different observatories all over the world, the signals being a broadcast of actual ticks of the observatory chronometer, over a period of five minutes," says Commander J. G. Bisset, R.D., R.N.R., in his fascinating book "Ship Ahoy."

"As a result of all these facilities for checking the chronometer, the average ship nowadays only carries one chronometer, or at the most two. The idea of carrying three before the days of wireless was so that one could be checked against the other, and in the event of a slight change of rate in any of them the two that synchronized could be taken as being in all probability correct."

How are ship's passengers to know the time so accurately obtained by the navigating officers on the bridge? Various means have been used, but the most modern system, known as "Pulsynetic," is probably the best yet devised. By this system all the clocks in the ship's public rooms, engine rooms, offices, etc., are controlled electrically by a master clock usually located in the chart-room. The master clock is a strong time transmitter operated by a balance wheel (a pendulum being obviously impossible on board a ship at sea).

As the ship sails east or west into a different meridian the time is of course, advanced or retarded. The "Pulsynetic" impulse transmitter is fitted with an operating key-lever and a dial engraved with minutes, so that all the clocks on the circuit are automatically altered as desired. This system is now in general use on most Cunard steamers including the "A" ships and the "Aquitania."

The passenger, warned by notice boards of the intended retarding or advance of time each night, and armed with the correct time electrically transmitted simultaneously to all parts of the ship, has little excuse for being late for meals, dances, games, or a score of other engagements which modern ship-life makes possible today.

Testing Waters Of Ganges

Scientists Find Bacteria Which Kill Many Disease Germs

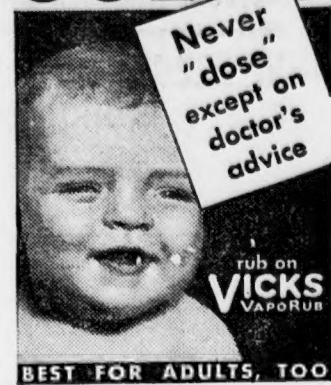

The belief of the Hindus that the waters of the Ganges have special life-giving properties has received confirmation from science. Experiments by scientists have shown that Ganges water contains bacteria which are able to attack—and kill—the germs of a number of diseases. The School of Tropical Medicine in Calcutta has been investigating these helpful bacteria, and it is hoped that cultures of them may be obtained which will be of use in fighting disease.

For treatment of caked bags in cows, or garget, use Douglas' Egyptian Liniment—the quick, sure remedy. Saves time and expense. Prevents blemished stock.

Will Use Saskatchewan Coal

Contracts awarded by the Manitoba Government for heating buildings owned by the province this winter call for coal mined in Western Canada, Hon. W. J. Clubb, Minister of Public Works, has announced. The government is also continuing the policy of using cordwood wherever feasible with a view to furnishing employment to settlers in Manitoba bush areas. Alberta and Saskatchewan coal will be used.

BABY'S COLDS

A Debatable Question

Bill Drafted In Old Country To Make Voluntary Euthanasia Legal

The Medical Officer of Health for Leicester has drafted a bill to make voluntary euthanasia legal. The subject is far too important to be thrust on one side by the political controversies of the moment, and though, of course, the bill in question stands not the smallest chance of passage into law at present, and will very likely never even be introduced, it ought at least to stimulate a serious discussion of a problem far too long deliberately side-tracked. The proposal that a person suffering from an incurable and acutely painful disease should be permitted, after legal authorization based on the most exhaustive examination of the case, to pass painlessly out of life at his own desire raises fundamental issues in the fields of law, of medicine and of religion. Reasoned objections and traditional prejudices will be ranged against it. There are few who would care to pronounce dogmatically either against the proposal or for it without prolonged and anxious reflection. But Dr. Millard, by once more giving the idea of euthanasia concrete form, has made it certain that the subject will be seriously explored.—London Spectator, London, England.

Requisite On the Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

Conductor.—"Hurry up there—these people want to get on."

Timid Passenger.—"Yes it's all right for you, you're only thinking of your jolly old bus—I'm thinking of my bag of eggs."

About 500,000 letters are carried by air mail in the United States every day.

ACID STOMACH

EXCESS acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. Harmless, and tasteless, and yet its action is quick. You will never learn of crude methods, once you learn how quickly this method acts. Be sure to get the genuine.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth-paste that safeguards against acid-mouth. (Made in Canada.)

Interesting Theory Is Held That Lunar Cycles And Sun Spots Have A Definite Effect On Weather

Foresters and hunters returning from the foothill district south and west of Edmonton report this year a tremendous increase in the number of field mice. Colonies of these little animals have reached such proportions that in some areas they are blamed with undermining large trees, leaving them with severed roots and little foothold in the earth. In some instances it is stated that large trees have fallen in quite gentle winds. While experienced foresters doubt if the mice can be held responsible for felling timber, pointing out that many of the trees in the affected district are "over-mature" and likely to crash, they do agree that the mice are more plentiful. This they ascribe to the "cycle." Dr. Rowan of the university has, by observation, fixed this as recurring every four years. Rabbits, as is well-known, become plentiful every nine years, even to the point of over-running whole districts, only to die off again in large numbers in the cyclic progression.

Scientists have been studying these strange cycles of abundant yield. Only last summer a conference was held in the forests of Quebec, attended by experts from many countries. Attempts to connect the phenomenon with the eleven-and-one-half year sun spot cycle seem to have been abandoned as a result of the information there exchanged. Many animals follow the nine-year cycle. Every nine or ten years there is recorded a tremendous increase in their numbers, and then, just as suddenly, there comes disease and they die by the million.

Generally speaking, it was found that about every nine years there were times of abundant productivity in plant and animal life covering most of the North American continent. The increase or decrease in the animal life was found to begin in the far north and to work its way southward and northward, reaching southeastern Canada after three years or so. Some most interesting curves were presented by Dr. Ralph E. Delury, assistant director of the Dominion observatory at Ottawa. He pointed out that the cycle of nine and a half years is but little longer than the lunar circle of 8.85 years and almost exactly half of another lunar cycle of 18.6 years. These two cycles of tidal activity may influence climate by stirring up ocean to the surface and thus influence waters, allowing cold layers to come atmospheric pressure and storm areas. Dr. Ellsworth Huntington supplied significant support for this lunar cycle of droughts and of agricultural productivity in the United States, with a period of 18.6 years when measured by the five cycles between 1837 and 1930. During the same time there have been six financial panics separated by five normal periods each of 18.4

In his paper, Dr. DeLury suggested that there are three influences controlling these cycles—a sunspot cycle of 11.2 years average and the two lunar cycles already referred to. He stated also that the yearly deviation of the earth's axis and its yearly revolution about the sun would provide a definite rhythm in life and climate. But even yet scientists are not ready to accept any explanation of cycles as final. They have been known and studied for hundreds of years. There was a cyclic law promulgated in India many centuries ago. Possibly in a few more centuries all cycles may be charted, their cause definitely discovered. Once that is done, predicting the future will be routine—but even then it is doubtful if all men will be ready to meet the rainy day.—Edmonton Journal.

W. N. U. 1917

Place Men On Farms

Saskatchewan Government Has Plan To Assist Unemployed

Plans for the placing of single unemployed men on farms in the drought areas of Saskatchewan, under the government assistance scheme, have been adopted, according to Hon. J. A. Merkley, Minister of Railways, Labor and Industries.

Under this plan, provision is made for the government paying the men \$5 per month allowance and the farmer \$10 per month, in certain cases. Payment of such sums are governed by special circumstances.

According to department officials, approximately 1,000 applications have already been received, and they are arriving daily at the rate of nearly 200.

The scheme is instituted with a two-fold purpose; first, of supplying needy farmers in the dried-out areas with necessary help and, secondly, to obtain employment for qualified farm laborers at present unemployed in the urban centres of the province.

Regulations for the placing of single unemployed girls on farms on a plan somewhat similar to those adopted for the placing of men are being prepared.

A Famous Bird

Daniel McCann, last survivor of the proud sextette which raised a young eagle into perhaps the most famous bird in American history, was buried recently at Eau Claire, Wis. McCann, 77 years old, helped care for "Old Abe," the Civil War eagle that P. T. Barnum tried to buy for \$20,000, until its death.

Bill Boards For Air Tourists

The billboard curse has taken to the air after having adopted all of the scenery along the country's highways. A sign has been erected near the airport at Tulsa, Oklahoma, which is so constructed that plane passengers can read its advertising message from the sky.

Geologists Find Traces Of Wealth Report Following Field Work Survey Will Be Interesting

Field work in connection with the geological survey service of Canada is over for the year, all parties having returned to Ottawa to prepare their reports. Additional information respecting the vast stores of Canada's untouched mineral wealth will follow from these compilations, several of the groups having devoted themselves to the acquisition of data in that connection.

In northeastern Manitoba geological conditions of an area several hundred square miles in extent in the Oxford Lake district are declared to be favorable for gold prospecting. Dr. J. F. Wright carried out the survey in this region.

Keen search for new sources of this metal is in progress in British Columbia. Dr. G. Hanson and Dr. H. C. Gunning conducted the operations on the Pacific Coast and report increasing production from placers.

Geographical and geological exploration of a large area of sedimentary and volcanic rocks near Rankin Bay, on the west coast of Hudson Bay, engaged the attention of Dr. L. U. Weeks. Observation flights over the whole area were made by airplane in addition to numerous canoe trips. At the close of the season the party was conveyed from Rankin Bay to Churchill, whence it returned to Ottawa.

Coal For Wheat

Proposal That Canada Buy British Coal On Barter Basis

Lord Gainford, former president of the Federation of British Industries, stated recently that he contemplated the day when Canada might buy British coal in exchange for wheat on a barter basis.

He advocated the adoption of barter between Great Britain and Canada as a means of short circuiting difficulties arising out of currency complications and suggested Canada might import British coal on this basis rather than take 16,000,000 tons annually from the United States.

An anthropological laboratory costing \$500,000 was recently opened in Santa Fe, N.M., to study the early days of mankind.

Back To The Land Movement Has Reached Heavy Volume During The Past Two Years

Springing out of a desire to return to the land, the back-to-the-farm movement in Canada has attained such volume that, in the past two years, more than 43,000 persons have been transferred from city to country.

The movement has been singularly steady ever since the industrial depression became severe. It is not the result of government propaganda, of any campaign to "influence" city unemployed in favor of agriculture. In every case, the request for transfer has come from the individual.

No pressure is being exerted from Ottawa to stimulate the movement and no financial assistance is being given.

Federal officials believe that what has happened is this—thousands of farm boys and farmers left their farms in the years of prosperity to go to the cities, work in industry, enjoy the bright lights. The depression has taught them that farm life has its peculiar advantages and they are eager to return. The government is trying to make the task easy and is meeting with tremendous success.

The 40,000 odd who have been located are spread fairly uniformly across the Dominion. They comprise 3,500 men with families and 25,000 single men. The general direction of the movement is vested in the colonization branch of the Immigration Department. Immediately the demand arose, the department invited the two railway companies, both large land owners, to co-operate.

Heat expanded one of the New York City bridges so much, on one August day this past summer, that the bridge could not be closed for an hour and 20 minutes.

An organ with a bronze keyboard and silver pipes was found not long ago at the site of the Roman city Aquinum, and is believed to date from the third century B.C.

The land officials of the railways, together with the field force of the land settlement board, made careful surveys of rural Canada to discover farmers who desired a hired man, and farms that were for sale. The railways had many saleable farm properties, as had the settlement board.

The business of connecting the city unemployed with the desired rural location then began. Single men were found positions with farmers, and, wherever possible, were placed under contract for one year.

Married men were found farms close to the cities in which they lived, and within their means. Long term payments at low interest also were arranged.

It was found that thousands of married men, unemployed and with little hope of employment, are not penniless. They have savings of from \$200 to \$500, sometimes more, and this is sufficient to make a small payment and leave something for the initial expenses.

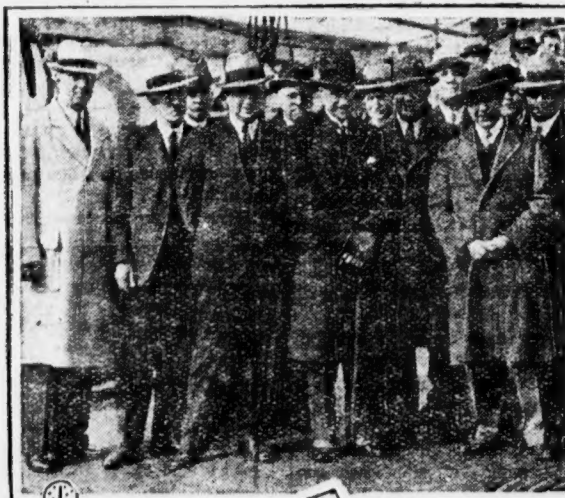

So general is the desire of unemployed to go on the land, that many agencies outside the three mentioned, are becoming active. Some effort will be made to bring these agencies under central direction in the immediate future. This will prevent duplication of work and will ensure uniformity of treatment. The view prevails at Ottawa that the soundest policy is one which refuses all subsidies or financial aid. In this way, those placed on farms are believed to have a better chance of permanent success.

Hubby — "Another new dress! Where am I to get the money to pay for it?"

Wife — "I don't know. I'm your wife, not your financial adviser."

Chlorine was discovered in 1774, by Carl Wilhelm Scheele, a Swedish scientist, when he poured concentrated hydrochloric acid upon manganese dioxide.

CELEBRATING THE NEW RELATIONSHIPS BETWEEN TWO SISTER DOMINIONS

To celebrate the inauguration of the new trade treaty between Canada and Australia, hailed as a prelude to more and far-reaching intra-Empire agreements, a goodwill cargoes of Australian products were shipped to Canada and return cargoes of Canadian goods are now on the high seas en route to the Antipodes. Australian shipments for the west, in part, reached Montreal by S.S. Canadian Constructor and came on by express freighter to Toronto for rail transshipment. Three hundred business men, provincial officials including representatives from the western provinces met the S.S. City of Toronto of Canada Steamship Lines when she reached the Ontario city and Australian colours flew for the first time in a Great Lakes port.

Photos show: Top left, a group of the welcoming delegation including L. R. MacGregor, Australian Trade Commissioner to Canada; Hon. Leopold MacAuley for Ontario; T. A. Enderby, General Manager, Canada Steamship Lines; Brig-Gen. J. G. Langton and A. E. Hyland, heading the visiting Australian Goodwill Delegation; top right: Mr. MacGregor presents the first sample of Australian pineapples to H. C. Grout, Toronto Board of Trade, with H. E. Laffer, representative of Australian viticulture and N. W. VanWyck, C.S.L. Freight Traffic Manager, in the background; lower left: one of the pair of young kangaroos aboard the vessel; lower right: S.S. City of Toronto on arrival with the first load of produce coming off.—Canada Steamship Lines Photographs.

WORLD HAPPENINGS BRIEFLY TOLD

Alberta Einstein will go to the United States soon to resume his studies at Mt. Wilson Observatory.

Canada still ranks third as a supplier of butter to Japan, the Dominion supplying 140,226 pounds valued at \$52,000 in 1930.

About 16 unemployed men have been sent to Churchill to supplement the skeleton force as caretakers and watchman this winter.

Dedication of the proposed international peace garden in Manitoba and North Dakota, will probably take place in July, 1932.

Tests of Alberta coal to ascertain the possibility of obtaining petroleum from the product have been completed by Dr. E. H. Boomer, of the University of Alberta.

A committee of Chinese residents in Victoria state that all their dealings with Japanese in Vancouver to the extent of \$300,000 has been boycotted.

Mrs. Thomas A. Edison, widow of the inventor, has approved a plan for a \$10,000,000 world memorial to her late husband.

Fifty million dollars, needed to keep South Africa on the gold standard, will be raised through London by the Union Government and commercial banks in co-operation.

Peru has informed the League of Nations that it accepted the one-year armaments building holiday proposed by the League. This brings the number of adherents to 40.

The great Yukon River stopped running on November 17, with the temperature at 27 below zero. The main river and all tributaries are frozen over solid, to remain so until next May.

The Isle of Man has made known its desire to adopt a national flag and the governor has been asked to take steps to procure the assent of the British Government. The only Manx flag which now approaches a national statute is a red ensign bearing three human legs.

Frequent Coal Mine Accidents

Take Lives Of 100 Men Monthly In United States

Too much important news is in the air for many of us to pay attention to the burial of six more coal miners in a gas explosion near Wilkesbarre, Pa. Four were dead when rescuers reached them, and only two were saved.

Despite safety campaigns, more than 100 men are being killed every month in American coal mines. Coal mine accidents killed 107 men in September, 112 men in August. In the first nine months of 1931, the toll was 1,079 miners.

For every million tons of soft coal mined three miners must give their lives, for every million tons of anthracite six must die.

Pre-Winter Fire Prevention Drive

Hon. J. F. Bryant Issues Appeal To Residents Of Saskatchewan

Making a final drive to stir Saskatchewan residents to concerted pre-winter, fire prevention activities, in order that premium rates on fire insurance might be reduced, Hon. J. F. Bryant, K.C., Minister in charge of fire prevention in Saskatchewan, has issued the following appeal to the general public:

"In view of the large increase in the number of fires in Saskatchewan, and the fact that the high premium rates on fire insurance are the result of past experience in the matter of fire losses, where the lack of care of the many adds to the burden borne by all who insure their property against loss by fire, I venture once again to suggest to the householders of Saskatchewan the desirability of checking up once more on the heating systems before the winter season settles in, in order to assist in keeping down the fire losses in Saskatchewan during the winter months.

"A survey recently conducted by the Wisconsin Industrial Commission discloses the fact that approximately one-fourth of the State's losses of \$10,000,000 per year was due to heating plant defects and neglects. Defective chimneys, burning out of unclean chimneys, woodwork embedded into or in contact with chimney walls, rusted stove pipes, pipes too near unprotected woodwork, and placing of ashes in cardboard or wooden containers, were the main causes of this needless loss.

"A few minutes' attention to removing these causes, and a few cents spent on new stove pipes, or on asbestos or zinc protection when the stove or furnace is near the woodwork, will save many Saskatchewan homes this winter. One Saskatchewan home was burnt down every day last year. See that your home does not go next!"

Recipes For This Week

(By Betty Barclay)

SNOW-WHIRL CHOCOLATE ROLL

(4 eggs)

6 tablespoons special cake flour, sifted.
6 tablespoons cocoa.
½ teaspoon baking powder.
¼ teaspoon salt.
¾ cup sifted sugar.
4 egg whites, stiffly beaten.
4 egg yolks, beaten until thick and lemon-colored.
1 teaspoon vanilla.

Sift flour once, measure, add cocoa, baking powder, and salt and sift together three times. Fold sugar gradually into egg whites. Fold in egg yolks and vanilla. Fold in flour gradually. Pour into pan, 8½ x 13½ inches, lined with greased paper, and bake in hot oven (400 degrees Fahrenheit) 13 minutes. Turn from pan at once onto cloth covered with powdered sugar. Remove paper. Quickly cut off crisp edges of cake. Spread seven minute frosting over cake and roll. Wrap in cloth until cool. Cover with an uncooked chocolate frosting.

TOASTED COCONUT SQUARES

1 loaf white bread.
1½ cups sweetened condensed milk.
1 can coconut, southern style.
Cut bread into 2-inch squares, ¼-inch thick. Dip each square in milk and drain slightly. Then dip in coconut covering all sides well. Bake in moderate oven (325 degrees Fahrenheit) 25 minutes, or until golden brown. Makes 3½ dozen squares.

Grading Helps Exports

Standardized Grading Of Eggs Has Been Of Great Benefit

Dependable quality is an advantage in the export market. During the past year, from October 1930 to October this year, exports of eggs from Halifax to Bermuda have held steady despite the advantage of lower price enjoyed by competing export product. This is a fine indication of the value of standardized grading for eggs and also of the beneficial of government inspection of export eggs. Canadian exporters have secured the confidence of the Bermuda market in the quality of their product and the reliability of our grades. The same is true with respect to the export of eggs to Newfoundland, where quality is winning confidence with the result that important new markets for Canadian eggs are developing.

CONSTIPATION

Banished for 20 Years

No one could have had more experience of constipation than this man. His method of correcting the trouble would surely put right anybody who suffers in a similar way.

"I am now approaching my 40th birthday and have used Kruschen Salts for many years. As a boy and youth I suffered at frequent times agonies from constipation. This was, after a time, somewhat relieved by a special pill compounded to a prescription, but which, at times, had a weakening effect. On someone's recommendation I tried a bottle of Kruschen Salts, and since then—a matter of at least 20 years ago—have used nothing else. My daily dose I take in hot water at 7.45 a.m."

—E. A. D.
The six salts in Kruschen are Nature's own prescription for keeping the organs of elimination working properly—gently but surely expelling all poisonous waste matter every day. Start on "the little daily dose" of Kruschen to-morrow and so take the first step along the royal road to perfect health.

Winter Cruises To Sunny South

Intriguing Programme Of Sailings Arranged By the Cunard Line

An extensive winter cruise programme of twenty-seven cruises, including ten "Millionaire" cruises to the West Indies, eight to ten days in duration; eleven cruises to the West Indies varying in length from four to twenty-three days; four cruises to the Mediterranean; one cruise to Mexico and South America and a cruise around the world, is announced for the Cunard Line by Arthur Randles, general manager of the Cunard Line in Canada.

The "Franconia" will set sail on her annual around the world cruise on January 9th, returning to New York on March 27th after having visited a large number of ports never visited by any other world-cruising liner.

Four cruises to the Mediterranean are scheduled commencing with the sailing of the "Mauretania" from New York on December 18th. She will be followed in January by the "Transylvania." On February 4th, and March 6th, the "Aquitania" will make two cruises to the Mediterranean from New York.

The "Samaria" will make the Mexico-South America cruise of fifty-seven days, and passengers will find "57 varieties" of new scenes and sights on this cruise. The "Samaria" will sail on February 6th.

The West Indies cruises will be carried on by the "Mauretania," "Franconia," "Aquitania," "Scythia," "California" and "Berengaria," commencing with the sailing of the "Mauretania" on November 18th and finishing with the "Scythia" when she sails from New York on April 16th.

The "Millionaire" cruises will be handled by the "Transylvania" and the "Caledonia." Both these ships will make the first of the cruises on December 24th and the "Caledonia" will make the last on April 22nd.

Besides, all these cruises a regular weekly service will be maintained between New York and Bermuda with a call at Nassau by the "Scythia," "Carinthia," and "Caledonia."

The gigantic cruise programme indicates the trend of the times for short holidays in the winter time to the sunny climes of the south and the bookings already indicate a most successful season.

Nothing Doing

Macpherson was changing his boarding-house, and when he arrived at the new one the landlady showed him to his room.

"Looks comfortable," said Macpherson.

"Yes," went on the woman, "most people admit I've made them comfortable here. I've always had a gift for doing that."

"Is that so?" asked Macpherson, doubtfully. "Well, ye needna' expect one frae me."

for COUGHS

Take half a teaspoonful of Minard's in molasses. Heat Minard's, inhale it. Also rub it well into your chest.

You'll get relief!

SUNDAY SCHOOL LESSON

NOVEMBER 29

PAUL'S LETTER TO PHILEMON

Golden Text: "There can be neither bond nor free . . . for ye all are one man in Christ Jesus."—Galatians 3. 28.

Lesson: Philemon.

Devotional Reading: 1 John 4.7-13.

Explanations and Comments

The Introduction To the Letter, verses 1-3.—This letter was sent to Philemon by the hand of Tychicus, who was going to Colossae and Laodicea with other letters from Paul to the other churches there. Timothy was with Paul and joined him, "a prisoner of Christ Jesus," Paul writes, in sending greeting to Philemon, and to Apphia and Archippus, presumably Philemon's wife and son, and to the church that met in his house.

Thanksgiving For Philemon's Faith, Love and Service, verses 4-7.—Philemon was a man of means, possibly one of the converts of Paul during his stay in Ephesus, and was greatly esteemed and tenderly loved by the apostle because of the way Philemon used his wealth and influence. His home was the meeting place of the church in Colossae. Paul in his distant prison had been greatly heartened and refreshed by reports of his ministries of love to the Christians in his city. Paul tells Philemon of this, and of his prayer and praise to God because of him.

"Hearing of thy love, and of the faith which thou hast toward the Lord Jesus," Paul writes. "The arrangement may have been intentional, and the apostle meant to suggest that at the heart of Philemon's love to the saints was his faith in the Lord Jesus: that the source and fountain of his philanthropy was his religion, and that without religion there would have been no philanthropy at all—it was born of his religion and sprang out of his religion. The reason for his lavish kindness to the saints was that the love of Christ constrained him."—J. D. Jones.

The designation of Philemon as fellow-worker may imply some actual co-operation at a former time. But more probably the phrase, like the similar one in the next verse, "our fellow-soldier," is but Paul's gracefully affectionate way of lifting these good people's humble work out of its narrowness by associating it with his own. They in their little sphere, and he in his wider, were workers at the same task. All who toil for furtherance of Christ's Kingdom, however widely they may be parted by time or distance, are fellow-workers.—The Expositor's Bible.

Trying New Phone Service

A new telephone service on trial in Holland permits from three to six persons to talk with each other over a telephone at one time. The new service is finding a wide use in commercial and public quarters, where conferences can be held and agreements arrived at without going from the office.

The normal yield of an acre of ginseng, the root of which takes 5 or 6 years to mature, is 2,000 pounds, valued at \$25,000.

BABY'S OWN SOAP

"It's Best for You and Baby too"

Dirigible Scrapped

Dismantled R-100 Being Sold For Scrap Metal

The dirigible R-100 is being sold for scrap metal, the British Air Ministry has announced.

The R-100 cost more than \$2,000,000. What she is bringing was not disclosed.

The dirigible made only one notable flight, from England to Canada in the summer of 1930.

Ever since the R-101 disaster over France, October 5, 1930, in which almost 50 persons were killed, there has been agitation against the use of dirigibles in the air force. Several times the question came up in the House of Commons.

When Viscount Philip Snowden, who was recently raised to the peerage, introduced his last budget, he announced that the R-100 would have to go. Economy was the reason. Only the motors and fabric will be retained.

The dirigible was completed November 28, 1929. Aside from her Canadian trip she made few trips except on test journeys over England.

Mistress: "I'd like to give you a good reference but you have never been punctual with the meals."

Maid: "Well say: 'She prepared the meals with as much punctuality as she received her wages.'"

Lovely Skin

Vegetable Pills Did What Creams Couldn't

"I find (writes Miss E. T. Clapham) that Carter's Little Liver Pills will do more to keep the complexion clear and the skin free from blemishes than all the face creams I have used."

Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL VEGETABLE and have a definite, valuable tonic action upon the liver. They end Constipation, Indigestion, Biliousness, Headaches, Acidity. All druggists. 25c and 75c red packages.

So Many Home Uses!

EMPIRE GOODS TO BE EXEMPT UNDER NEW LAW

London, Eng.—Canadian goods will not be taxed under the National Government's anti-dumping legislation. This was made clear in the House of Commons when the resolution, conferring sweeping powers upon the President of the Board of Trade, passed through both stages.

The resolution would grant to the President of the Board of Trade power to impose a maximum duty of one hundred per cent. on a long list of products. But L. Hore-Belisha, Parliamentary secretary for the Board of Trade, explained no Canadian or other Dominion products would be affected. "The Dominions are to have a preference," he asserted amid cheers, "and it is to be one of one hundred per cent."

There would be no cause for complaint concerning the treatment of Dominion products, said the Parliamentary Secretary.

Charles Williams, Conservative, introduced an amendment which would provide that duties against British Empire products would not exceed two-thirds of the rate imposed on similar foreign products. This would represent, he explained, a preference of one-third for the Dominions but, at the same time, he hoped the Government would announce empire goods would be excluded entirely from the scope of the legislation.

There was need for no alarm, replied Mr. Hore-Belisha. "I have already made the declaration, and I make it again, that no articles which are empire products will be chargeable for duty under the bill." The Williams' amendment then was withdrawn.

The measure was an emergency one, members of the Government frankly admitted, designed to meet abnormal conditions. In advancing it both stages at the one sitting, the House disregarded its usual procedure, but "ordinary procedure, would take a fortnight," it was suggested by Rt. Hon. Walter Runciman, president of the Board of Trade, as the House agreed to speed up its routine.

Davison Again Calgary Mayor

Defeats Communist Opposition Candidate By Huge Majority

Calgary, Alberta.—Mayor Andy Davison was carried on an avalanche of independent votes into the mayor's chair here for the next two years. Phil Luck, Communist, lone opponent to challenge the mayor's right to a second term, lost out in every section of the city.

Final result of the vote, heaviest in the history of the city, was: Davison, 17,324; Luck, 1,028; majority for Davison, 16,296. The total vote was 18,352, which was approximately 4,000 more than the ballots cast in the civic election last year.

Would Stop Gas Waste

Oil Company Declines To Accept Government Conservation Policy

Edmonton, Alberta.—The Imperial Oil Company has declined to accept the agreement for the conservation of gas in Turner Valley as proposed by the Provincial Government's advisory committee, Premier Brownlee announced, following lengthy two-day conferences during the past two days with Vice-President A. M. McQueen and officials of the company.

Premier Brownlee added that the Government would immediately consult its technical advisors and stated he was determined to use every possible means to stop the waste of gas in the valley.

U.S. Team Wins

Toronto, Ont.—Riding faultlessly, a crack team of United States army officers swept the opening event of the Royal Winter Fair Horse Show, placing one, two and three in the individual open events, and winning the first two places of the team jumping contests. More than 11,000 persons watched the show, featured by the international contest between British, Irish, French, Canadian and United States army representatives.

Honors Go To Alberta

Exhibitors Of Reward Wheat Score At Royal Winter Fair

Toronto, Ont.—Leading honors in the spring wheat classes at the Royal Winter Fair went to Alberta. The first six placings except fourth, out of nine prizes went to exhibitors from that province. This is the most important event in the seed department of this show and really represents the wheat championship class for Canada. There were over 70 entries this year and all wins were made on the outstanding variety, "Reward," a wheat originated by the Dominion Experimental Farms. The winners were: Eddie J. Shank, Athabasca, first; J. H. B. Smith, Pincher Creek, second; William Taylor, Grand Prairie, third; George Canfield, Wild Rose, Sask., fourth; Fred Paverly, Wembley, sixth; Herman Trelle, Wembley, sixth; Alex Paul, Dauphin, Man., seventh; A. Anderson, Swan River, Man., eighth; and Leslie Bartlett, Vauxhall, Alberta, ninth.

Trade Policy Suggested

U.S. Senator Would Welcome One Mutually Beneficial

Ottawa, Ont.—"Canada has been the best customer for United States products; and I should be very glad to see a policy pursued mutually beneficial for both countries and which would increase the trade between Canada and the United States." So stated Hon. W. H. King, Democratic United States Senator from Utah, and prominent member of the finance committee of the United States Senate. Senator King is a member of the United States Congressional Party visiting Canada under the aegis of William Randolph Hearst, publisher, to investigate the Canadian sales tax system.

Labor Minister Takes Rest

Senator Robertson Advised To Enter Hospital For Short Time

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labor, has been advised to go to hospital for a short time before leaving Ottawa on a trip. Senator Robertson, who has been carrying a very heavy load for the past year or more because of the unemployment situation, is in a run-down condition. He had planned to go away for a trip but his physician advised him to go to the hospital for a while first.

During the absence of Senator Robertson, Hon. H. A. Stewart, Minister of Public Works, will be acting Minister of Labor.

No Foundation For Report

Government Not Prohibiting Importation Of Natural Gas Into Canada

Ottawa, Ont.—As far as can be learned here there is no present basis for the report appearing in an Eastern Canada financial paper that the Dominion Government proposes to prohibit the importation of natural gas into Canada.

No recent move has been made in that direction. During the debate on the budget at the last session, suggestions were made that such action be taken. They did not receive very serious consideration and since then the matter has not been under review.

Reports Conditions In England Better

Recent Election Was Marvellous Opinion Of J. P. Morgan

New York, N.Y.—J. P. Morgan unexpectedly broke his usual silence upon his return from Europe to observe that "things are looking a good deal better in England."

In response to a question: "How are conditions in England?" he said: "It was a marvellous election and it looks as if the Nationalist Government will be in for a long time."

Germany's Crop Above Average

Berlin, Germany.—Germany's grain production for 1931 includes 3,669,000 tons of winter wheat and 564,000 tons of summer wheat, said its final crop report. The wheat crop exceeds that of last year by 440,000 tons and is 30 per cent. above the average for the last seven years.

Italy has ruled that all flour made in the country must contain 95 per cent. Italian wheat.

EMPIRE BROADCASTING

Right Hon. J. H. Whiteley, Chairman of the British Broadcasting Company, announces that a station is under construction to which the whole British Empire may listen. Several wave lengths will be used in order to provide the best reception under varying conditions.

Liberals Win Seat

Ontario By-Election Is Won By Opposition Candidate

Guelph, Ont.—Carrying a constituency that has been Conservative, with but one exception, since 1902, Paul Munro, Liberal, was elected to the Ontario Legislature for the riding of South Wellington. His majority over W. P. Gamble, Conservative, was 258. The vote was: Munro, 7,209; Gamble, 7011.

The by-election was necessitated by the death a short time ago of Hon. Lincoln Goldie, former provincial secretary in the Ferguson Government.

Mitchell F. Hepburn, M.P., Provincial Liberal Leader, said the result was significant of public opinion throughout the province.

The result of the by-election leaves the party standing in the legislature as follows: Conservatives, 88; Liberals, 15; Progressives, five; Independent Conservatives, two; U.F.O., one; Labor, one.

Borden Issues Warning

Says If Boom Created It Might Have Disastrous Reaction

Montreal, Que.—While there were signs of improved feeling in the business world, Rt. Hon. Sir Robert Borden, president of Barclays Bank (Canada) in addressing the fourth annual meeting of the shareholders here, cautioned against the use of this change in general feeling for the purpose of creating a "boom" which might have a disastrous reaction.

The board of directors were re-elected, and Sir Robert Borden was re-elected president and Arthur B. Purvis, vice-president.

Study Agricultural Problems

Delegates From Alberta To Attend Meeting In Toronto

Edmonton, Alberta.—Prominent Alberta agriculturists, headed by Premier J. E. Brownlee, will attend a meeting in Toronto on December 27 which has been called by the Canadian Chamber of Commerce for the purpose of discussing possibilities of the formation of a Canadian institute of agriculture.

The functions of the proposed institute would include a thorough and continuous study of agricultural problems and of marketing possibilities in Canada and other countries, and the dissemination of information as to quantity, quality and sales requirements of these individual markets. Besides Premier Brownlee, who will deliver one of the three keynote addresses, the Alberta party attending the conference will include: H. A. Craig, Deputy Minister of Agriculture; Senator D. E. Riley, High River; E. W. Jones, Superintendent of Agriculture for the Canadian Pacific Railway at Calgary.

Girl Wins Scientific Honors

Astronomer At Harvard Observatory Awarded Henry Draper Medal

New Haven, Conn.—Development of a girlhood fascination for gazing at stars from the attic window of her Dover, Del., home, led Miss Annie Jump Cannon to one of the highest scientific honors here.

She was presented with the Henry Draper medal by the National Academy of Sciences, the first woman to win this award for scientific achievement.

Miss Cannon is an astronomer at Harvard Observatory. She has catalogued more than 300,000 stars. The meaning of this may be understood by recalling that all the seeming myriads of visible stars number only about 5,000.

Britain Pays Debts

Bank Of England Makes Full Payment To United States

New York, N.Y.—The Herald-Tribune said the Bank of England was entirely out of debt to the federal reserve system of the United States on October 31, "having apparently paid off every dollar of the \$125,000,000 credit which fell due on that day."

The Herald-Tribune says this fact is disclosed in the federal reserve board's current monthly review, released for publication.

Postpones Return To India

London, Eng.—Mahatma Gandhi decided to postpone his departure for India following a conference with Prime Minister Ramsay MacDonald. The announcement gave rise to the hope that the failure of the second round table conference on Indian affairs may still be averted.

OTTAWA EXTENDS WARM WELCOME TO U.S. VISITORS

Ottawa, Ontario.—Canada officially welcomed the United States Congressional Party studying the Dominion sales tax system at a banquet tendered here by the Canadian Government. From Rt. Hon. Sir George Perley, acting Prime Minister, and Hon. E. B. Ryckman, Minister of National Revenue, who is actively assisting the American party in its enquiry, came the warmest words of greeting, friendship and assurances of co-operation. And by Hon. T. P. Gore, beloved senator from Oklahoma, afflicted with blindness nearly half a century ago, words of appreciation and international goodwill were expressed.

"We in Canada are here as interpreters between Great Britain and the United States," Sir George Perley declared. "No duty could be more pleasant or more important than a task of interpreter; because I believe that with the British Empire and the United States holding together we can accomplish anything we like for peace and happiness in this world."

A strong belief in the Canadian sales tax system was indicated by Mr. Ryckman. "The nation that has a deficit unprovided for is not a nation that can hold up its head among the nations of the world," the Minister of National Revenue declared.

"Destiny has established Canada and the United States as neighbors," Senator Gore stated. "We are destined to be and remain neighbors for ever and a day. We are destined to be neighbors as long as the grass grows, and as long as the water flows. We would not slip that golden chain or break that bondage of friendship."

The dinner tendered by the Government concluded the first day of the stay in the capital of the Congressional Party who visited Canada under the auspices of William Randolph Hearst, publisher. All members of the Dominion cabinet in Ottawa, were at the head table with the United States Minister and leading members of the visiting party.

Farm and Labor Party

Single Government For Three Prairie Provinces Is Advocated

Brandon, Man.—Single government for the three prairie provinces should be sought by united efforts of farm and labor organizations in the west, advises A. J. Macauley, president of United Farmers of Canada (Saskatchewan section). He told the convention of United Farmers of Manitoba that prairie government was costing entirely too much.

Leader of the 30,000 members farm body which recently decided to step into politics, Mr. Macauley said farmers of Saskatchewan believed they could co-operate with the Independent Labor Party on an economic policy aimed at bettering conditions for farmer and workers.

"It is time we got down to real economic issues," Mr. Macauley counselled. "We must avoid slippery politics and endeavour to do the things that are the best for the west. Political parties are controlled by campaign funds. There is every possibility of a conference in the near future of agriculturists representing the area from Quebec to the Pacific Coast to set up a national fiscal policy designed to aid agriculture."

Royal Winter Fair

New Record Is Established For Number Of Exhibits

Toronto, Ont.—A new record has been set by the Royal Winter Fair in the number of exhibits for this, its tenth year. An estimate of the number of animals and birds follows:

Horses, 1,000; cattle, 4,400; swine, 1,000; sheep, 600; cats, 250; dogs, 600; poultry and pet stock, 7,500.

The entries from all classes total 16,500 which is a new high mark.

May Increase Gasoline Tax

Quebec, Que.—Prediction that all Canadian provinces would increase their gasoline tax this year was made by Premier L. A. Taschereau, to a delegation representing provincial automobile associations which protested against a rumored increase in this province.

ENGLAND'S PROUD LITTLE MISS STEPS OUT

Here is the most popular little girl in the British Empire, Princess "Lilybeth" with her Mummy and Dad, the Duke and Duchess of York, entering the tiny church at Balcombe Parish, England, to attend the wedding of Lady May Cambridge. The little Princess was a flower girl.

EDOUARD J. ROULEAU,
Editor and Publisher

TO PRINT OR NOT TO PRINT

One of our exchanges has been severely criticized for not printing the names of all who appear in the police court of his town. The editor takes the position that when the offenders appear in the police court and pay their fines or accept their jail sentences, they are paying in full the demands of society. By publishing their names, the editor insists that he is taking additional toll, and is bringing shame and suffering to members of families who merit better treatment. They are already shamed, in their relationship.

The Cranbrook Courier, however, takes another view, saying that the best way to keep from being called a thief in print is to refrain from stealing. The Courier continues:

"Someone is always erubbing about having their name appear in the police court docket. Generally speaking, a newspaper contracts to give its readers the news. Filling contract is not a pleasant business when the news is bad. It must be remembered that the newspaper does not make the news, and is not responsible for it. To blame the newspaper for printing bad news is a more sensible than blaming the mirror for reflecting the morning after the night before, or blaming a physician for the illness of his patient. If the Courier reports a crime committed by some member of your family, it does not by doing so take sides against him—any more than a mirror becomes a partizan when it reflects unpleasant truths. It would much rather report some great accomplishment of his or some conspicuous proof of virtue. But it cannot manufacture facts. If a man who robs a bank falls out with us for reporting the incident, he does not thereby lessen his guilt. He might rave

and rant as proof of his resentment but he would be a rogue still. The paper is not the one to blame. Hating the paper will not change the facts. The way to keep from being called a thief is to keep from stealing.—High River Times.

WORLD CENTRES SHOW AN INCREASE IN POPULATION

Nearly two score cities of the world have a population of a million or more, it was revealed with the announcement that Mexico City had gone over the magic mark in its 1931 census by annexing its suburbs.

Another indication of the great trend of population to the cities and the tremendous rates of growth metropolitan centres have experienced was noted in the recent Moscow census which gave the capital of the Soviet republic 2,745,000 inhabitants, an increase of 35.5 per cent since 1926.

Even Leningrad, one-time capital of the Czars, which was understood to be slowly dying as the soviet state neglected it in favor of the development of Moscow, was revealed as having jumped into the two million class, with a gain of 38 per cent in 5 years. Most of the great cities on the earth

have been counting heads in the last year and some startling figures have resulted. London showed 8,000,000, while New York reached 7,000,000. Chicago jumped into the three million class, Berlin just stopped short of 5,000,000, two additional United States cities—Detroit and Los Angeles—counted above a million. Seven countries now have cities of more than a million. China leads the list with seven. United States is next with five, and six others with a metropolitan population above a million.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET PEDLER

Author of
"The Splendid Folly," "The Hermit
Of Far End,"
Hodder & Stoughton, Ltd., London.

CHAPTER VI.—Continued.

"You know perfectly well what I meant," she answered, a tremor born of anger and wounded feeling in her voice. "You thought I was inquisitive—trying to find out your name—"

"Well"—humorously—"you were, weren't you?" Then, as her lip quivered sensitively, "Ah! Forgive me for teasing you! And"—more earnestly—"forgive me for not telling you my name. It is better—much better—that you should not know. Remember, we can only have this one day together; we're just 'ships that pass.' He paused, then added: "Mine's only a battered old hulk—a derelict vessel. And derelicts are best forgotten."

There was an undercurrent of deep sadness in his voice, the steadfast, submissive sadness of a man who has long ago substituted endurance for revolt.

"Remember, we can only have this one day together." The quiet utterance of the words stung Jean into a realization of their significance, and suddenly she was conscious that the knowledge that this unknown Englishman was going away—going out of her life as abruptly as he had come into it—filled her with a quite disproportionate sense of regret. She found herself unexpectedly up against the recognition of the fact that she would miss him—that she would like to see him again.

"Then—you want me to forget?" she asked rather wistfully.

Her eyes fell away from his as she spoke.

"Yes," he returned gravely. "Just that. I want you to forget."

"And—and you?" The words seemed dragged from her without her own volition.

"I? Oh"—he laughed a little—"I'm afraid I'm inconsistent. I'm going to ask you to give me something I can remember. That'll even matters up, if you forget and I—remember."

"What do you want me to give you?"

He made a sudden step towards her. "I want you to dance with me—just once. Will you?"—intently.

BABY FRETFUL, RESTLESS?

Look to this cause

When your baby fusses, tosses and seems unable to sleep restfully, look for one common cause, doctors say. Constipation. To get rid quickly of the accumulated wastes which cause restlessness and discomfort, give a cleansing dose of Castoria. Castoria, you know, is made specially for children's delicate needs. It is a pure vegetable preparation; contains no harsh drugs, no narcotics. It is so mild and gentle you can give it to a young infant to relieve colic. Yet it is as effective for older children. Castoria's regulative help will bring relaxed comfort and restful sleep to your baby. Keep a bottle on hand. Genuine Castoria always has the name:

W. H. Hatcher

CASTORIA
CHILDREN CRY FOR IT

W. N. U. 1917

He waited for her reply, his keen, compelling glance fixed on her face. Then, as though he read his answer there, he stepped to her side and held out his arm.

"Come," he said.

Almost as if she were in a dream, Jean laid her hand lightly on his sleeve and he pulled aside the portiere for her to pass through. Then, putting his arm about her, he swung her out on to the smooth floor of the "salle."

They danced almost in silence. Somehow the customary small-change of ballroom conversation would have seemed irrelevant and apart. This dance—the Englishman had implied as much—was in the nature of a farewell. It was the end of their stolen day.

The band was playing "Valse Triste," that unearthly, infinitely sad vision of Sibelius' and the music seemed to hold all the strange, breathless ecstasy, the regret and foreboding of approaching end of which this first, and last, dance was compact.

It was over at last. The three final chords of the "Valse"—inexorable Death knocking at the door—dropped into silence, and with the end of the dance uprose the eager hum of gay young voices, as the couples drifted out from the "salle" in search of the buffet or of secluded corners in which to "sit out" the interval, according to the spirit moved them.

Jean and her partner, making their way through the throng, encountered Madame de Varigny on the arm of a handsome Bedouin Arab. For the fraction of a second her eyes rested curiously on Jean's partner, and a gleam of something that seemed like triumph flickered across her face. But it was gone in an instant, and, murmuring some commonplace to Jean, she passed on.

"Who was that?"

The Englishman rapped out the question harshly, and Jean was struck by an unaccustomed note in his voice. It held apprehension, distaste; she could not quite analyse the quality.

"The Cleopatra, do you mean?" she said. "That was my chaperon, the Comtesse de Varigny. Why do you ask?"

He gave a short, relieved laugh.

"No particular reason," he returned with some constraint. "She reminded me—extraordinarily—of someone I used to know, that's all. Even the timbre of her voice was similar. It startled me for a moment."

He dismissed the matter with apparent indifference, and led Jean again into the same little alcove in which he had found her. They stood together silently in the dim, rose-hued twilight diffused by the shaded lamp above.

"Well," he said at last, slowly, reluctantly. "So this is really the end of our stolen day."

Jean's hands, hanging loosely clasped in front of her, suddenly tightened their grip of each other. She felt herself struggling in the press of new and incomprehensible emotions. A voice within her was crying out rebelliously: "Why? Why must it be the end? Why not—other days?"

Pride alone kept her silent. It was his choice, his decision, that they were not to meet again, and if he could so composedly define the limits of their acquaintance, she was far too sensitively proud to utter a word of protest. After all, he was only the comrade of a day. How—why should it matter to her whether he stayed or went?

"I always believe"—the Englishman was speaking again, his eyes bent on hers—"I always believe that, no matter how sad or tragic people's lives may be, God invariably gives them one magic moment—so that they may believe in heaven. . . . I have had mine today."

"Don't you—believe in heaven?" He laid his hands lightly on her shoulders.

"I do now. I believe . . . in a heaven that is out of my reach."

His hands slipped upward from her shoulders, cupping her face, and for a moment he held her so, staring down at her with grave, inscrutable

eyes. Then stooping his head, he kissed her lips.

"Good-bye, little comrade," he said unevenly. "Thank you for my magic moment."

He turned away sharply. She heard his step, followed by the quick, jarring rattle of brass rings jerked violently along the curtain-pole, and a moment later he was gone. With a dull sense of finality she watched the heavy folds of the portiere swing sullenly back into their place.

CHAPTER VII.

Which Deals With Reflections

The dawn of a new day possesses a curious potency of readjustment. It is as though Dame Nature, like some autocratic old nurse, wakes us up and washes and dresses our minds afresh for us each morning, so that they come to the renewed consideration of the affairs of life freed from the influences and emotions which were clogging their pores when we went asleep. Not infrequently, in the course of this species of mental ablution, a good deal of the glamour which invested the doings of the previous day gets scrubbed off, and a new and not altogether pleasing aspect of affairs presents itself.

This was somewhat Jean's experience when she woke on the morning following that of the fancy-dress ball. Looking back upon the events of the previous day, it seemed to her newly-tubbed, matutinal mind almost incredible that they should have occurred. It was like a dream—life itself tricked out in fancy dress.

Stripped of the glamour of romance and adventure with which the unknown Englishman had contrived to clothe it, the whole episode of their day together presented itself as disagreeably open to criticism, and the memory of that final scene in the alcove sent the blood flying to her cheeks. She asked herself in mute amazement how it was possible that such a thing should have happened to her,—to "our chaste Diana," as her father used laughingly to call her in recognition of the instinctive little air of aloofness with which she had been wont to keep men at a distance.

Of course, the Englishman had taken her by surprise, but Jean was too honest, even in her dealings with herself to shelter behind this excuse. She knew that she had yielded to his kiss—and knew, too, that the bare memory of it sent her heart throbbing in an inexplicable tumult of emotion.

The stolen day, that day embarked upon so unconcernedly, in a gay spirit of adventure, had flamed up at its ending into something altogether different from the light-hearted companionship with which it had begun.

Then her conscience, recreated and vigorous from its morning toilet, presented another facet of the affair for her inspection. With officious detail it marshalled the whole series of events before her, dwelling particularly on the fact that, with but very slight demer, she had consented to abrogate the accepted conventions of her class—conventions designed to safeguard people from just such consequences as had ensued—and winding up triumphantly with the corollary that although, like most men in similar circumstances, the Englishman had not scrupled to avail himself of the advantages the occasion offered, he had probably, none the less, thought rather cheaply of her for permitting him to do so.

To Be Continued).

Heads Are Larger

London Hatter Says Seven and Half Now Normal Size

A London West End hatter states that hats have been demanded larger in size during recent years. He was unable to explain the phenomenon. If anyone had asked for size 7½ a few years ago it would have been a special order. But today the big head is quite normal, and it is necessary to have 7½ in every style of hat, ready made on the shelves.

For a Starter

"How is my daughter getting on? Do you think she will make a great singer?"

"It is very hard to say."

"But surely she possesses some of the qualifications?"

"Well—er—she's got a mouth, certainly!"

Due to the long hours of sunshine, combined with high altitude and cool air, no part of the world is more suitable for sun treatments and sunshine clinics than Canada.

Harsh, Gripping Purgatives Are Dangerous!

**ENO'S
"FRUIT SALT"**

Cheap, harsh laxatives may prove very costly. Painful rectal troubles are often aggravated by the unnatural gripping condition such cathartics cause.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

An Interesting Exhibit

Thuringia Princess Spent Thirty Years Completing Collection Of Dolls

At Arnstadt, in Thuringia, an exhibition unique in its way is attracting hundreds of admiring spectators. It is the collection of dolls which was once the hobby of a princess. Early in the eighteenth century Princess Augusta Dorothea of Schwarzburg-Arnstadt spent thirty years making the collection complete. It comprises 450 dolls and eighty dolls' houses, and is so arranged as to give an accurate picture of the court and citizen life of the period. Groups of dolls also represent scenes from the working and commercial classes, with every detail of the costumes worn in these days.

Persian Balm—the ideal toilet requisite for every discerning woman. Perfect in results. Creates complexions of rare beauty and charm. Delightfully cool and refreshing. Never leaves a vestige of stickiness. A velvety smooth lotion toning and stimulating the skin. Making it truly rose-leaf in texture. All dainty women invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

Had the Proof

Mother—"Come Bobby, don't be selfish. Let your little brother play with your marbles. Look how he's crying."

Bobby—"But he means to keep them always."

Mother—"I think not, dear."

Bobby—"I tell you he does. He's swallowed two of them already."

Little Helps For This Week

"And who is thy neighbor?"—Luke x. 29.

O Man, forget not thou, earth's honoured priest!
It's tongue, its soul, its life, its pulse, its heart,
In earth's great chorus to sustain they part;

Chiefest of guests at Love's ungrudging feast,
Play not the niggard, spurn the native clod.

And self disown;
Live to thy neighbor, live unto thy God,
Not to thyself alone.

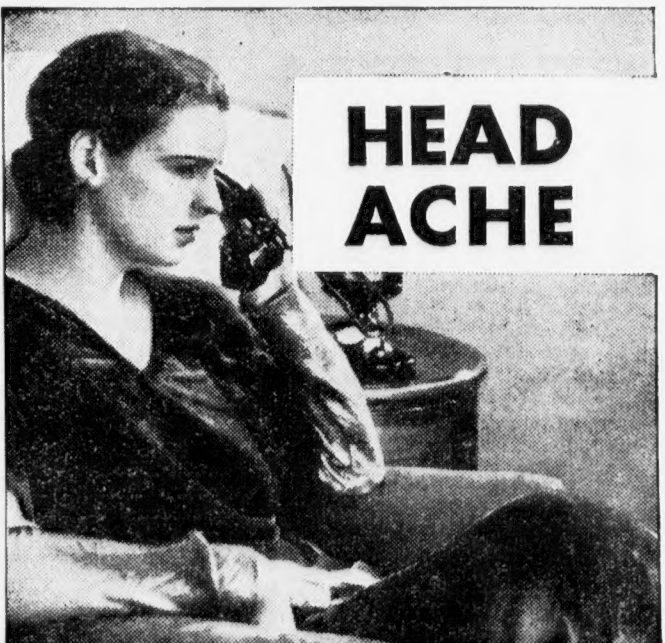

—S. W. Partridge.

What is meant by our neighbor we cannot doubt; it is everyone with whom we are brought in contact. It is every one who is thrown across our path by the changes and chances of life; he or she, whosoever it be, whom we have any means of helping,—the unfortunate stranger whom we may meet in travelling, the deserted friend whom no one else cares to look after.—Arthur Penrhyn Stanley.

How near must a person live to me to be my neighbor? Every person is near to you whom you can bless. He is nearest whom you can bless most.—William Ellery Channing.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

The "fan-shell," a fish nearly two feet long, in some wonderful manner can snap its two halves together in a flash to entrap any wandering fish.

HEAD ACHE

THE woman who lets headaches upset her plans must have her eyes and ears closed to certain facts about Aspirin. There is always swift comfort, and never any harm, in Aspirin tablets. Doctors have said so; men and women everywhere have found it so. Any headache—from any cause—is always relieved by one or two tablets. And lots of other aches and pains. Neuralgia. Neuritis. Rheumatism. Nagging pains. The pain from colds which make you "ache all over." Sore throat. Systemic or "muscular" pain. Aspirin can spare you lots of needless suffering! Be sure you get Aspirin—not a substitute!
